RateAClub.org Website

Test Plan

Brian Pigford, Joseph Hays, Matt Kelley, Emmanuel Maku, Austin Lane, Chad Lenz,

Max Cardillo, Nick Myers

DATE TBD

Table of Contents

Introduction

The purpose of testing this website is to ensure that it is working properly before presenting it to our clients for use. Our goal is to get all the bugs out of the website before presenting to our clients so that it will run the way it was designed to run.

Constraints

One constraint that we have is that some of our members are CIS (computer science) majors and some are ISM (info systems management) majors so not everyone has the same strengths such as programming or business relations/ knowledge.

Test Items & Environment

Approach

Roles

Brian Pigford: Team Lead, created database, hosted website
Joseph Hays: Test case creator
Matt Kelley: Test case creator, Created AWS (even though it ended up not being used)
Emmanuel Maku: Login
Austin Lane: HTML creator
Chad Lenz: HTML creator
